Regulations :

ISO 17631 requires the use of these symbols on fire plans and booklets for new vessels or where existing fire plans have been significantly modified. These symbols are currently intended for use solely on fire plans, but in response to requests from the industry they are offered as signs to identify actual equipment where no standard sign is available.

Purchasers should be aware that they are not currently recommended for use as signs by any official body. Although this situation may change if the future, there is no guarantee that the designs will be identical to those shown below.
